

Toka Mohamed Aly Attiah El-Borie

Software Engineer | Backend, Full-Stack & AI Development | APIs & Scalable Systems
01141080121 |  toka.attiah@gmail.com | ³ [LinkedIn: @tokaelborie](#)

Professional Summary

Results-driven software engineer with 3+ years of experience in backend development, full-stack engineering, API integrations, and AI-powered solutions. Skilled in building scalable, high-performance applications using modern frameworks and technologies. Passionate about solving complex problems and delivering innovative, data-driven solutions that drive business success.

Professional Experience

Software Engineer

Chayah Group | 2024 – 2025

- Developed and maintained backend infrastructure using PHP, improving server performance by 15%.
- Designed APIs enabling seamless data transfer and system reliability.
- Optimized database queries, reducing response time by 20%.
- Defined Git workflow, streamlining development.

Software Engineer

Nweave LLC | 2021 – 2023 | Alexandria, Egypt

- Led full-stack development using Laravel, Vue.js, and Docker, improving speed by 30%.
- Conducted code reviews, reducing bugs and improving quality.
- Developed plugins and modules that enhanced system functionality.
- Improved client satisfaction with 95% on-time delivery.

Education

Master's in Computer Science (Ongoing), Faculty of Science, Alexandria University –
Computer Science Department

Professional Diploma for Postgraduates – Open-Source Application Development,
Information Technology Institute (2021 – 2022)

B.Sc. in Computer Science, Alexandria University (2016 – 2020) | CGPA: 3.29/4 (Very Good)

Technical Skills

Languages: Python, PHP, JavaScript, HTML5, CSS3, JQuery

Frameworks/Libraries: Laravel, Vue.js, Magento

Databases: MySQL, SQL Server

Tools: Docker, Git, Postman, Webflow

Other: Agile/Scrum, API Development, CI/CD

Key Projects

Mini Job Board – Full Stack Job Board | Laravel, Vue 3, MySQL, Bootstrap

Developed a job board with authentication, job posting, application management, RESTful APIs, and a responsive frontend.

CARTI-RevOps – Financial Management System | Laravel, Vue.js, SQL

Built full modules including backend, frontend, and DB architecture; improved scalability and maintainability.

CHIPS – E-commerce Platform | Magento, PHP, XML

Developed APIs for mobile integration, custom MVC modules, and optimized system performance.

UAMS-CBR – Employee Vacation Management System | Vue.js, .NET, SQL

Led frontend team, guided members, reviewed and refactored code for quality, and managed gradual server updates.

Zeustra – E-marketing App | PHP, HTML, CSS, JavaScript

Created custom plugins, integrated with WordPress to enhance website functionality.

Courses & Certifications

Python for Applied Data Science, AI And Development – IBM

Built a strong foundation in Python programming, including syntax, data structures, control flow, and object-oriented concepts.

Gained hands-on experience with Pandas, NumPy, Jupyter Notebooks, and working with APIs and web scraping for real-world data extraction.
